THE RETURN OF ELECTRONIC GAMING...

"Oh, the times they are a changin'." I think it is a pretty good way to describe the video game industry, and especially the magazines that serve it. While other publications have changed, ranging from key people moving on, to major staff overhauls, we here at Sendai have been growing into a huge family of gaming enthusiasts just like you! In fact, over the past year, we have doubled the number of people bringing you EGM! We are constantly looking for, and hiring, the best people in the field to insure rapid growth and the best news and reviews you can find.

To this end I am very pleased to announce the addition of perhaps the best known editors in the industry to the Sendai staff. The names Arnie Katz, Bill Kunkel and Joyce Worley need no introduction. They have been writing about video games and computers since the late '70s and launched the very first magazine to serve the hobby. They now will edit a brand new multi-format magazine called **Electronic Games**. Older players will remember a magazine of the same name from back in the Atari 2600 days. The nineties version of Electronic Games should be on store shelves in a few months, with Katz, Kunkel and Worley, not to mention other staff such as the world renowned Game Doctor contributing on a regular basis. The Game Doctor, in addition to gaming's most famous editorial trio, will also have regular columns in EGM and our sister publication, Computer Game Review.

Why introduce Electronic Games when there already is an EGM, Mega Play, Super NES Buyer's Guide and Computer Game Review? The folks at Decker Publications, who will be producing the monthly magazine, feel that there isn't a good multi-format magazine on the market that is designed especially for the older, mature game player. EGM and our other specialty magazines will continue to sport the first news and photos of all that's hot in the gaming world, only now they will be enhanced with the combined experience and knowledge of Arnie Katz, Bill Kunkel, Joyce Worley and the Game Doctor. We're honored to have them on board.

In other news, as you can see, along with this issue of EGM, there are several supplements and, most importantly, our semi-annual CES magazine. This time, we have made special arrangements to get the 32 page CES magazine to you even earlier than ever before! Last year we were first with full CES coverage in our August issue. This year we have bumped that up one month and you are reading this only a couple of weeks after the show! This is not a partial pre-CES compilation of data from phone calls and company prepared slides as you have seen from others. The photos you are looking at were taken over all four days of the show! We hope that you will like this special issue as much as we enjoyed putting it together!

While times are a changin', for us, and ultimately you the reader, we feel that this change is going to make a major impact on the entire industry. To that end we would like to paraphrase another popular expression from a rival industry: "...you lead, follow or get out of the way."

CAPCOM'S SF2 CONTROLLER DELAYED TILL FALL...

Sources at Capcom have informed us, that due to production problems, its new 6 button SF2 controller has been delayed until Fall.

STREET FIGHTER 2 FEEDBACK...

Thanks for getting us the latest info on SF2. One thing puzzles me, though, and you can best answer it. If the game is already out in Japan and there is very little language translation involved, why is it taking so long in getting here?

Chi Ling
Jersey City, NJ

Of all the game magazines, you have had the most thorough coverage on SF2. There is one thing which nobody has covered yet. What do the Bonus Stages look like?

Henry Tran
New York, NY

In your April issue you describe all of the moves in SF2 with letters like S, U and D. I haven't played the game. What do they mean?

Will Quintana
Hollywood, FL

(Ed. Letters continue to pour in by the thousands requesting, pleading and demanding more information about the mega hot Street Fighter 2 cart.

As mentioned above, the Capcom

stick has been delayed. This is very unfortunate for Capcom because, as we predicted months ago, other third party controller manufacturers will have their 6 button sticks out in time for the launch of the cartridge. Make sure to check our exclusive 32 page CES supplement packed with this issue for the names of the other controller manufacturers.

Like you Chi, we were somewhat surprised that the U.S. version of SF 2 would be coming out in July rather than in June as the Japanese version is. A few calls got us the reason. It is none other than the big N sticking its nose in the development of the cart. Sources tell us that Nintendo of Japan had no problem with the Japanese version of SF2. Here in the U.S., it is a completely different story. NOA had serious problems with the blood in the game. Capcom wanted the game as original as possible, but Nintendo had to have it toned down. Since all games have to have the blessing of NOA, the game had to be sent back for reprogramming. Hence the delay.

The moves were abbreviated as follows: C - Charge for 2 seconds; K1 - Short Kick; K2 - Forward Kick; K3 - Roundhouse Kick; P1 Jab Punch; P2 - Strong Punch; P3 - Fierce Punch; F - Forward; B - Back; U - Up; D - Down; L - Left; and R - Right.)

The car bonus round is in the S-NES version, as is a new 'bricks' bonus stage!

ZELDA 4...WHEN?

I've beaten Zelda 3 in 9 days (April 17-26). It was so easy, especially when they included the map and the hints. The hint book gave all the major secrets away. Why must they ruin the game by giving all the major secrets away? You really jumped on Sega for its Phantasy Star hint book. Shouldn't you do the same for Nintendo? I waited years for this version and I probably will have to wait even more until the next one. I feel so depressed. I love that game! Do you have any news on Zelda 4? What should I do in the meantime? What game would you suggest?

Bret Saunders
Columbus, NE

What's with Zelda 3? Nintendo promises to bring it out last fall and then they made me wait 6 months longer. Why? Easy, to give them time to print up a tip book that completely destroys the game! Don't they realize that some players actually want to find their own way through the game?

Carlos Sanchez
Austin, TX

(Ed. We were as surprised, and as disappointed, as you were when we opened up the production Zelda box, only to see the map and book. It appears that Nintendo doesn't want to be bothered with all the phone calls that would come in from players who got stuck in the game. Their solution...pack a 'give-the-game-away' hint book with the cart. Of course their come-back is - don't look at the hints, but players are only human, and it's so easy to sneak a look when a player gets stuck. Don't expect the fourth in the series to come out for quite some time Unless they are working on a new CD-ROM version?)

Young Galem looks at a world he will soon control.

Van is not alone in his attempt to save the kidnapped Laura.

Galem at his most evil.

Welcome to Planet. Idea, where men are men, women have really cool psychic powers, and cats can fly a spaceship. You are Van, a young man from Clan Is and who must go face to face with Idea's dastardly ruler, Galem. Galem has kidnapped Laura, your childhood sweetheart, and is using her natural psychic powers to control the planet. But you won't be alone in your quest. You will be a deadly Pico, a cat who, among other things, is a space pilot and has some raw psychic powers of his own. As you join you on your journey, S. Babbette, a rookie cadet in the Cosmic Space Command who is training in the art of mind control. You even have the ability to use some magic of your own. But if you think that you can just put on a blue leotard and a big red cape and expect to destroy Galem, then you've been flying a little bit too close to the sun lately. In order to be triumphant, you and your friends (yes, the cat too) will need to learn about the powers of magic and psychic techniques, because your enemies already possess these powers and can't wait to try them out on you. So harness your mental abilities and crush Galem's evil empire. Or else this fantasy could turn into a real nightmare. Because a mind is a terrible thing to waste. Especially when it's yours.

Cosmic Fantasy

The setting is 19th century Japan where a sword is a Samurai's best friend. Put yourself in the shoes, or sandals, of one of the three Samurai generals, Yontomo, Yoshitsuno, or Kiyomon, who are feuding for the vacant Emperor's throne. Strategically move your troops throughout the country, either to keep the enemy from storming your castles or to conquer and control one of theirs. Make your army a lean, mean, conquering machine by giving them expert training in such fields as fencing, archery, and castle storming. And if they've had a rough week, take them to one of the nearby villages for some much needed R&R, where they can regain their strength. Or go to one of the local monasteries where you can gain useful advice. But don't drink your victory sake so soon. The other two Samurai generals are also trying to battle their way to the throne, and they are more than willing to fight you to the death to get there. So assemble your troops and do battle, but do it well. Because if your army is conquered, you may just lose your mind. And your ponytailed head, too.

EGM SCOOPED...?

I always read your magazine and it is fabulous! Your coverage of the Super NES CD-ROM has been impressive, even though the system is still in development. I must confess though, there is a newly released magazine, and I have to say, their coverage of the Super NES CD-ROM is better than yours. They had photos of the system and two of Nintendo's games for it - a 3-D Tetris and F-Zero 2. They even played the games! I know you guys must have known about the games, but why didn't you print anything about them?

Brian Dagg
Dearborn, MI

(Ed. Yes, we knew about these pictures and the 24-page fanzine that they ran in. Here are the details on the pix which they didn't bother to tell you about. All of the U.S. game magazines get the Japanese game magazines. It is a good way for editors to stay on top of the news and rumors in Japan. However, some news is sometimes worse than no news. It happens to be that those game photos (and the pix of the CD-ROM) ran in one of the Japanese magazines earlier this year. When Ed saw them in the Japanese mag, he freaked out, about the same as you did when you saw them. But, he did something the other guys didn't do...he had the Japanese text translated. The text says that the photos are bogus, and were made up by the Japanese magazine. They were examples of what the editors thought the Super Famicom CD-ROM could do. Why didn't we run them any way? If you read the fine print in the masthead of every U.S. and Japanese magazine, you will find words to the effect that...nothing (pictures, drawings etc.) can be used without written permission of the magazine. To do so would be stealing, and could lead to lawsuits. Because of Ed's close ties with the Japanese editors, he has been able to get us such written permission from most of the Japanese mags, but not that one. They are very protective of their material.

As to how they played the games, since they don't exist... And just 20 pages before these pix, the editorial talked about truth, honesty and credibility in reporting facts and rumors.)

PRICE WARS...

I am thinking about buying one of the new 16-Bit systems. Both the Genesis and Super NES seem equal and I don't know which to get. That is until I heard that Street Fighter 2 is coming to the S-NES. Games aside, is it me, or have the system prices been dropping? Should I wait? Will they drop further?

Craig Warnom
Atlanta, GA

(Ed. Very observant Craig! Since last Christmas, the system prices have indeed been dropping. The S-NES, which started out at about \$199, is now down to \$149, and the Genesis has been reduced to \$129. As we mentioned in the past, this year is a 'system year.' Both Sega and Nintendo (and TTI) are doing everything they can to get the players who have the old NES, to upgrade to the 16-Bit systems. Nintendo and its licensees started in January to 'wow' the players with their upcoming super hot games. Sega has decided to take a pass on the first 6 months and start its push during the second half of the year. Will the prices come down even further? Most likely. Come around September when the heavy-duty shopping starts, expect the price battle to continue. Could the systems get below \$100 like the TurboGrafx? It's possible. We have seen in our travels to Japan, the Mega Drive (the Japanese Genesis) selling for 9,800¥ (\$75) in the past (without a pack-in cartridge.)

SONIC 2...WHEN?

Clearly the best game ever made for the Genesis was Sonic the Hedgehog. The only problem with it was that it was too short and too easy. You have been talking about a sequel for some time now, is there any more information on Sega's '16-Meg wonder'?

Andy Barnkowitz
Toronto, Can.

(Ed. Sega has been quite secretive about this mega-hot sequel. With CES just days away as we go to press, the best info on this cart has Sonic now with a mysterious buddy, who has two tails. Sonic still moves at warp speed - even in reverse! Sonic can travel

through time and his journey will span from the prehistoric era, where dinosaurs roam, to a polluted machine-controlled future. The evil Dr. Robotnik is back and he has a new batch of nasty creatures. As Quatermann stated months ago, the cart is 16-Meg, and this means more levels and more enjoyment. The Genesis cart is scheduled for a November release and the Game Gear version in December. Photos weren't available before the CES, but check out our exclusive coverage on this cart in our special 32-page CES magazine packaged with this issue.)

WHO'S ON FIRST...?

You guys are always tackling the tough questions that the readers send in. Here's an easy one for you. Doesn't Konami make the Bill Elliott's NASCAR Challenge game? It is hard to keep track these days with different companies getting the rights to the same game for different systems, but I thought it was a Konami rather than a Capcom game. Also, while I have your attention, was your Revenge of Double Dragon (June issue) the same as the Super Double Dragon reported by another mag in July? Why did they say they had the first photos?

Brendon Meyers
Hartford, CT

(Ed. You're right, that is an easy question Brendon. Bill Elliott's NASCAR Challenge is a Konami and not a Capcom game. We've been in the mag business for some time now and there are a couple of things that really make you look bad. First, don't make obvious dumb mistakes in the editor's column. If the editor can't get the right game matched with the right company, how does that reflect on the rest of the magazine, and second, when the head honcho of a major company is in a picture, at least get his company's name right. Errors happen, and due to the hectic business we are in, a zero error mag is an impossibility, but we all try to keep problems to a minimum. Revenge of Double Dragon is the Japanese name of the game. Tradewest changed that to Super Double Dragon for the U.S. And yes, despite the 'never before seen' and 'first look' hype, we did run the pix the month before.)

GAME OF THE MONTH

STREET FIGHTER 2

You can tell the competition is getting tough this month when a Platinum Award winner (Turtles 4) doesn't win the game of the month award! Still the 16 meg wonder wins hands down because everything about the game is about as close to perfect as a game can get. Definitely the one to buy this month, if you can find a copy.

S Now that he has his 'ghini, Steve is happier than a clam. Zero to 60 in 4 seconds...WOW! If its wing was any larger it would fly!

E Ed's off to Japan after CES. Seems he has a chance to test out the new CD-ROMs and 32 bit systems over there!

M Now that he beat SF2, Turtles 4 and Axel, Martin is eagerly awaiting the start of CES to see the next generation of games.

S Having mastered U Champion Edition, S Sushi is flying in H from Tokyo to take on all those who dare to challenge X him at the CES.

The ultimate in arcade fighting games is finally scheduled for release on the Super NES! All of your favorite World Warriors are here with their original special moves! Choose from eight warriors and fight face-to-face with the top fighters. The sounds and graphics are nearly identical to the coin-op! Become the next World Warrior with Capcom's Street Fighter III! M. Bison is waiting for your challenge!

The long awaited home translation of Street Fighter 2 is packed as a nearly perfect translation of the arcade masterpiece! All the moves, graphics, game play and sounds are rolled into one 16-Meg cartridge that will do anything but disappoint fans of the arcade original or fighting games in general. Awesome!

Games just can't get any better. Never since Pac-Man has there been an arcade game that was this popular. The home version is just as good. The moves are perfect, the graphics outstanding and the audio exceptional. Get one of the new 6 button sticks and you'll know you're playing the arcade version.

Street Fighter 2 didn't grab my attention in the arcades. After seeing this cart at CES for the SNES, I was hooked. Now I've been spending my spare time playing the coin-op, waiting for the 16-Meg monster. Well it has arrived and you won't be disappointed. Definitely the best cart available anywhere! Incredible game play!

Phenomenal! Awesome! The Best! Street Fighter II is the only game I have ever seen that really deserves a 10! Superb graphics, animation, no flicker, no slowdown, great music, arcade game play, and let's face it, no game has ever compared to this. I wish this was an arcade - until now! Only SF2 C.Ed. could be better.

The Turtles are back in their brand new 16-bit adventure! That nasty Shredder has stolen the Statue of Liberty. Of course, the Turtles are hot on the chase but Shredder has banished them to a timewarp from which they will never return. There are ten levels of hard-hitting action with lots of Mode 7 effects. A cool, new feature is the two player vs. mode where you can select two turtles and battle each other!

Quite honestly the best side-scrolling action game to appear on the Super NES so far. This game is perfectly presented and executed with flawless detail. Besides virtually duplicating the arcade title, Turtles 4 also delivers some of the best graphics you'll ever find at home! A truly great game that's a tad easy.

Each version of the Turtles has been better than the one before it. Now, with the the game going from the 8 to 16 Bit machine, Turtles 4 reaches an even higher level of excellence. Near perfect game play, great special effects, and new moves all help make this one of the best games around. Too easy though.

The Turtles are back with style that won't quit. The game play is awesome! More moves and techniques than ever before grace the superb play control. Excellent graphics and jamming music make this one of the best looking, best sounding SNES carts around. Great two-player action with no slowdown. Too easy.

TMNT IV: Turtles in Time is another conversion masterpiece. If the scaling were better, it might have gotten a 10, too! Three cheers to Konami for getting their programmers in line for this game! Smooth game play, arcade graphics, and a cool vs. mode make TMNT IV a Super NES hit to look out for! Happy, happy!

CIRCLE #209 ON READER SERVICE CARD

Bowling was never quite like this! Introducing Super Bowling by American Technos. Super Bowling has all the sights and sounds of a night at the bowling alley. Up to four players can compete and select their own ball weights. You can even adjust the amount of wax on the alley. You can enter a true league mode, or play in the practice series where you can practice before the game starts. Try the golf mode for even more fun.

If you're going to make a video adaptation of bowling, this is about as close as you can get to making it entertaining. Super Bowling gives you a wide range of options that include player selects and attributes, but goes even further by tossing trick games into the mix. It's very well executed play mechanics. Good for a fun time!

Who would ever think that bowling could be a great S-NES sports cart? It is! Very humorous animations and tons of options in the set-up menu make this an exceptional simulation of the sport. It's innovative, fun and still challenging for the serious bowler. It really stands out as a 4 person game. Great for parties!

Super Bowling has a few cool features, I like being able to pick the different bowlers who are right or left handed. The game play is OK and easy to get used to. The multi-player mode is really cool when 4 people are playing. More should of been done with Mode 7 but as a whole this cart is fun to play.

Not bad, but not the best. I will expect some really good games in the future now that Super NES programming is getting better. The graphics are good, but the Mode 7 effects aren't the smoothest in the world. I would have liked to see more game variations to keep my interest past two or three games. Still, it is good.

Basketball games have leaped into a new dimension! NCAA Basketball has all the thrills and spills of an actual game with the addition of some fantastic Mode 7 effects! The court scales and rotates with every move you make! You have a choice of five divisions with nine games in each division. Head onto the court and shoot some hoops. As your players become tired, you can substitute in better players.

This game provides owners of the Super NES with an absolutely incredible, in-your-face basketball simulation that not only takes full advantage of the system's Mode 7 scaling and rotation, but also puts up a decent game of b-ball to boot! A laid back approach that always remains realistic makes this cart a blast in my book!

There soon will be a bunch of new basketball games for the SNES. Which one to buy? I recommend this one because of its unique first person perspective. It won't be for everyone as purists will still want a top notch overhead game. Still, for a new view to an old sport you ought to give this one a try. You won't be disappointed!

This is probably the most realistic B-ball game that I've ever played. The new first person perspective is unbelievable and puts you right into the game. The graphics are a little choppy, but for the overall effect HAL did great. I have a feeling that HAL will be for Super NES what EA is for Genesis when it comes to sports titles.

This is innovation in the making! I'll bet that if Hal America makes a sequel to this, it will be even better! The graphics are a little choppy, but the all-new perspective incorporating full-field scaling is very impressive. If you are really into basketball, but don't feel like you are on the court with most games, check this out!

Dragon Strike is FCI's new branch into the market of NES shooters. Pick from three mighty dragons; bronze, silver and gold. Each dragon has special abilities like freezing enemies and then blowing them away! Play through 14 levels of fast action and face strange creatures waiting to kill you off. The view is from an overhead perspective so get a perfect view of the highly detailed landscape!

Although this game is not exactly what you might expect, the game's theme and overall goals do provide a few thrills. In general, however, the graphics and game play fall short, even with a wide variety of options thrown in throughout the action. It's not a totally lacking product mind you, I just wish they had packed in more.

It's from an RPG company, the name sounds like it should be an RPG, but it isn't. Of all things it is a shooter, and not a bad one at that. While the graphics could be better, the game play is OK. I like the overhead view, and the choice of three different dragons, each with different abilities is all right. Good but not exceptional.

Something happened on the way to the reprogrammers. The computer game was a 1st-person dragon flight simulator with air jousting. Sounds cool? What we have though is an overhead shooter with not very good graphics and annoying sounds. The game play is very limited and control is sluggish.

This would be a better game all-around about two years ago. The graphics are good for 8-bit, but the music is hard to swallow after a while. The game play is not too bad, either. Dragon Strike somehow just doesn't strike my fancy as a hot upcoming title. You know, I think I've seen this game many times before.

CIRCLE #183 ON READER SERVICE CARD.

Mr. Gimmick is Sunsoft's latest NES title. You play the part of Mr. Gimmick, a green blob with special magical gifts. His main weapon is a mystical star that forms over his head to seek out enemies. Collect bottles that give Mr. Gimmick new powers like fireballs, invincibility, and powerful bombs. The five levels are beautifully detailed with pastel colors while the bosses will present quite a challenge to Mr. Gimmick.

Here's a game with a cool theme that could have been explored in a hundred different ways. Instead it's a repetitive attempt at the action genre with difficulty that is obviously geared to the wee sprites. Kids games don't have to be completely lacking, however, and more time could have made this one a winner.

OK, so it looks cutesy and seems like a great game for a 7 year old, but wait. Instead, you get a very challenging game that requires a great deal of technique. It starts off easy, but that is only practice. Get farther into the game and you'll have quite a challenge. Definitely a sleeper. Give this one a try!

Mr. Gimmick has a few cool options to the game play and the pure theme will attract younger players. I can't get excited about moving a little bogger around the screen though. The graphics are OK and the sounds are decent but other than that the game play is very simple and needs more variety. Not bad, but not great.

Mr. Gimmick is one of those games that the kiddies can relate to. The levels are nicely detailed for a NES game but with only five levels the variety just isn't there. The music is kind of catchy but wears thin after a while. The game plays rather well, however. The score would have been higher if it wasn't so easy.

Todd's Adventures in Slime World is a slimy, messy good time! Poor Todd has crash-landed on a slime covered planet infested with slime-coated creatures! Todd's only weapon is a water pistol that he uses to blast enemies. Collect various items to increase your odds like the gun enhancements, slime shields, jet packs and mega bombs. Compete against each other in the two player mode.

I was never a real fan of the original Lynx version of this search and destroy cartridge, so it goes without saying that the Genesis version fell far from tripping any triggers. Although the presentation is slightly better than the small screen version, the overall mission is the same and, in my opinion, remains awkward and flat.

It's good to see this fine game on a decent system. The Lynx is OK but the Genesis has more going for it - like a screen you can see from more than 4 inches away. Decent game play and very good graphics make this a good action game. The levels are long enough and should offer the player a good challenge.

Being a fan of the Lynx version, this cart had a lot to live up to. The graphics are very good and the animation is still smooth and the slime is very fluid. The game play has lost a lot of its original control and this severely affects the enjoyability. The sound needs a little reworking, as it can get annoying.

All right! Another cool adventure/maze game is out for the Genesis! Lynx players will recognize this title, but Slime World was always destined for the big time. It's getting so that no matter what system you own, your favorite game will appear on it any way. Slime World is a solid game filled with secrets and surprises.

Dragon's Fury is a pinball game with a few special twists. The playing field is decorated with animated demon heads, endless ball traps and a flippers galore! The graphics are simply breathtaking, while the sounds are right from the arcade. Locate hidden bonus levels to score big points. The animations of these creatures is nearly perfect, but watch out because these creatures fight back with the fury of a dragon!

Like other video pinball games that have appeared in the past, Fury provides the usual assortment of targets to destroy and point incentives to rack up. The game also succeeds in offering bonuses that the real thing can't offer, like changing backdrops, bonus rooms and changing playfields! A nice game for pin fans!

Now this is a good pinball game. Plenty of onscreen action, animations of hidden little tricks and point bonuses to find. The bonus rooms are a definite plus and add to the longevity of the cart. The screen scrolls nicely to follow the ball and the difficulty is set high enough to keep the expert players coming back for more!

The Genesis plays a pretty good game of pinball. The game play is good and there are plenty of bonus rooms to find. The graphics, while weird and demonic, are impressive. The music is good and fits the action well. The game is far too easy and ends very quickly. Frustration is what kills this cart's replay factor.

Besides the obvious demonic symbolism strewn everywhere, Dragon's Fury is a great pinball game for the Genesis. The hidden bonus stages and modern music are just what every gamer looks for in a jammin' pinball title. Again, many gamers will recognize the name of another name, but it has the Genesis' flair.

The Best Games in the World™

Bullet-Proof Software

Rack 'em up because Side Pocket is here! What may look to be just another pool game, Side Pocket offers many many new challenges to any fan of pool! In addition to playing a simple game of pool, there is a special trick game where you can win bonus points for scoring on trick moves. Wine glasses are strategically placed on the table and you must maneuver through them to sink the ball. A great party game!

This was one of my favorite NES games when it was originally released. Although the game play has remained intact through the transfer onto the Genesis, not a lot has improved either. Not a totally bad point, but I wish Data East would have spiced things up a little more than they did! Good pool sim nonetheless!

I liked the game on the NES and I like it even more now that it is on a 16 bit system. Better graphics and more options make this a fun game. The trick shots will take some time to master but once you get the angles down the shots aren't that hard. While not everybody's sport, those who play pool won't be disappointed.

Pool, billiards, what's the difference? This cart takes the classic game and brings to your video screen. The game play is very good, and the aiming technique is cool. The game is geared for the adult crowd and the many different women hanging around the tables sport off the Genesis' digitized graphics. No betting please.

As a very big billiards fan, Side Pocket went under a very critical eye by this reviewer for glitches and bugs. The only problem I could find with Side Pocket is that you can only aim the cue at a limited number of angles. Otherwise, you have more than enough games and challenges to keep your interest. Joy, joy!

Fly high in the sky with Falcon for the TG-16! Get briefed on your upcoming mission, load up your jet with power packed armaments and get set to dog fight with the best! Check your detailed cockpit display for information on enemy advances, damage, and weapons left. If you and a friend each have TurboExpresses, you can connect them together and fly missions with each other and have a dogfight slugfest!

You can't duplicate the look and feel of a flight sim and expect to fit it into a tiny cartridge without cutting a lot of corners. In addition to slicing away many of the more complex features the control and overall interaction between player and game has become even more awkward. Some games should never be attempted.

It must be unbelievably difficult to do a good flight/battle sim and as this is yet another which just doesn't cut it. The flight control isn't as smooth as it could be and took some time to get used to. It's fun to fly around and blow up a few planes but there just isn't enough variety to keep me interested. Only an average game.

I had hoped that the new company would start off with a dynamic patch of games but not with this one. The music and sound effects are less than average and the control is very hard to get used to. To make it worse there is usually no action on the screen and as a result it was hard to keep my interest up in the game.

Falcon is an okay game with an okay theme. The main problem is that there is not enough play mechanics to really get me excited. There isn't sufficient action up in the sky and what there was, wasn't enough. The graphics are about average but they could have been much better with just a little extra effort.

In the 30th century, a main computer executes its final orders to take over a space station nearing completion. You have been sent in to destroy this computer before it can complete its orders. Your ship is equipped with a special attack unit that can seek and destroy enemy ships. There is a whole slew of intense weapons to choose from. Five stages of super intense shooter action await you in Last Resort.

Last Resort is a great game that is packed with fantastic graphics and some jammin' sounds. The general animation and color is fantastic in many areas of the game. What plagues this title from being a killer addition to the shooter library is game play that slaves to a virtual standstill. 52 Meg is a terrible thing to waste.

The game looks good. Lots of fast, very intense action, detailed background graphics, challenging game play and great audio normally adds up to a great game, but, to me it was too short. While some of the levels are killers, I really had hoped for more for the money. Perhaps in their next shooter.

Something bad happened on the way to the U.S. In Japan the cart is 45 Meg, our version has 52. Hooray, they added a free slow motion feature for U.S. gamers. And that's not all, you also get an abundance of flicker. All this for just under 200 bucks! A good shooter plagued by bad programming. Only 5 levels, come on SNK!

Bad move, guys! Last Resort has some of the greatest still shots I have ever seen in a shooter, and the details are great, but the SLOW-DOWN feature slows down everywhere, and on a "32-bit" machine, this is an atrocity! Especially if you are paying big bucks for a supposedly "superior" game. That turned an 8 to a 5, SNK.

GameBoy - Hudson

ADVENTURE ISLAND

Theme: Action Available: Now
No. of Levels: 8 Megabits: 1

Princess Tina is lost! She's stranded somewhere on one of eight islands, and, as the somewhat heroic Master Higgins, it is your job to find her. Adventure Island for the GameBoy is a new adventure unlike anything before. The islands are large but there are four types of dinosaurs just waiting to give you a lift! Take the time to search for hidden eggs as you do not know what surprises may lie within!

I like the way this game plays and I have to commend Hudson for doing an admirable job of duplicating the look and feel of this successful series on the GameBoy. The actions are familiar as well as the quest, but as a take-along action goes, this game has a little bit of adventure for every action fan.

I like the entire Adventure Island series, including the new GameBoy cart. The portability factor more than offsets the lack of color. The game plays slow enough so there isn't any screen lag, and overall, it is just a good fun game suitable for players of all ages. Nothing difficult to do, just a good way to pass time.

This cart has alot of potential and offers great Adventure Island game play on the go. The music is decent and the graphics are fair for GB standards. The main problems with any action can be made for GameBoy is the terrible blurring that occurs whenever you scroll the screen. Other than that this is a very good GB cart.

Yay! Adventure Island on GameBoy! This black and white title has some really good game play and music, but the graphics still blur too much. I feel that this is a problem that is too severe for any programmer to deal with. Let's wait for a color Game Boy, please! These great titles are being massacred by black and white.

Game Gear - Sega

AERIAL ASSAULT

Theme: Shooter Available: Now
No. of Levels: 4 Megabits: 1

Game Gear owners never had much of a selection when it came to shooters. Introducing Aerial Assault. You are the only pilot that can stop an invading swarm of enemy fighters. Blast your way through 4 levels of super intense action as you power up your ship to epic proportions! Your power up choices include a three way shot, barriers, and a super powerful guided missile. Earn your wings with Aerial Assault.

This is definitely sub-standard shooting action in my book. Not only is the onslaught of invaders Aerial Assault presents repetitive and not very interesting, they also don't present much in the way of real challenges. This is completely straightforward with no bonus technique or risk incentives to speak of. Boring!

Aerial Assault certainly isn't the best shooter that Sega has brought out in the past year. The graphics are OK but there really isn't any intense action to get you involved in the game. It's a short enough game to be a "back seat" pacifier for the kids and the silence that it produces is more than worth the price of the cart.

OK, the Game Gear doesn't have alot of shooters available, but why not bring out something a little more intense. Aerial Assault has a few cool power-ups and enough action to occupy you for awhile. There's not enough technique and the game gets really repetitive quickly. Why not bring SMS R-type to the GG. Hmmm.

After all the great titles I've seen this month, I believe my standards have gotten a little higher. Aerial Assault is a decent game for a road trip or a quick break, but it isn't brain-buster material by far. The graphics are okay, but the action isn't really fast-paced or exciting. Look for better titles in the future.

Lynx - Atari

LYNX CASINO

Theme: Chance Available: Now
No. of Levels: N/A Megabits: 2

How about a nice game of poker? Lynx Casino lets you play poker, but you can also risk your cash with blackjack, roulette, craps, and of course, the video slot machines. As you travel from table to table, you will see some strange people playing standing around. Talk to each one of them to learn secrets. Who knows? You may just see Elvis Presley walking around. Test your luck with Lynx Casino.

There's not much you can fault in this game. If you want to do some video gambling, then the Lynx has you covered. Plenty of variety in the games and a number of important options are addressed. Personally, these types of games get repetitive quickly, but if you're up for a Las Vegas adventure, go for it!

I always thought that Elvis was alive and living in Las Vegas and this game proves it! Not much to say - it is gambling, and all the Vegas traps are here. It is a good version as everything is readable even on the small screen. That makes it fun to play, even if you lose money. One of the better portable gambling carts.

This is one of the better casino simulations out there. The game has enough variety and many different ways to try your luck. My favorites are the Slots and Roulette. There are even added bonuses, like finding out one of favorite rock stars of old is hangin' out in the lounge. Too bad the King died on the throne.

Are you a hard-core gambling fan? Do you like betting it all on a long shot? If so, then Lynx Casino is for you! Lynx Casino takes some of the hottest Las Vegas games and puts it all in your hands! In fact, the ingenious programmers of Atari even went so far as to add humorous anecdotes throughout the game! Joy!

GAMING GOSSIP

...Nintendo and Sega Axe Prices...Lynx Returns With Batman...New Info on Sega CD-ROM and Sonic 2...
...Sega To Bow New Gun...Street Fighter 3 Released...Streets of Rage 2 Readied...New Magazine to Appear...

...Welcome one and all to the chambers of Dr. Q, here once again with a money back guarantee on the best rumors science can engineer! It has been a hectic month in the lab, boys and girls, but your favorite destroyer of video game white shirts has never looked Q-ter...Well, both Nintendo and Sega dumped their prices in major ways, leaving you and I with 16-Bit alternatives ranging from 149 to 129 bucks respectively. Could the recession be playing such a big role in shaping the future of the American gaming way? The Q-Mann sez "No way"! The drop in coin just leaves the big guns pocketing 100 clams in the margin instead of the normal 150...While we're on the subject of Nintendo and Sega, did you ever wonder what would happen if these electronic rivals called a truce? You'd probably see the best version of Mario ever made on the Genesis and a tripping 16-Bit Sonic with scaling and rotation that would make the Super NES fly like never before! Nice dreams, eh...

...Two bits of gossip news from the frontlines of Sega! First and foremost is the news that the execs who founded Frogger have decided to end their battle with the inventor who took the rest of the industry to the bank for millions. Sega balked, however, and the full blown legal hassles left a judgement in favor of the inventor to the tune of 40+ mil! Good call Sega, especially when you could have bought your way out of the mess for a measly couple of million bucks...Here's a bit of gossip that comes from the guy who only comes out at night! Sources close to the Quartermann have indicated that Sega is hard at work on an add-on that will give the Genesis full shooter status and a whole new line of light gun games! Sounds like you're scoping Nintendo's bazooka, Sega, and while the Q-Meister knows it's hard, you should really pass it up...

...In an quest to push more Lynx game systems into the hands of a content (yet very grey) group of GameBoy users, Quartermann has discovered rumors that Atari is making big plans to push Batman into their boxes as the give-away to lure Gotham fans to their games! Not a bad move Atari, but how about some news on the Jaguar? Yours truly is beginning to think it never existed...Oops! The Quartermann has stuck his Quarter-tool right smack into his Quarter-mouth! TH*Q, not Acclaim, has gobbled up the rights to the dysfunctional cartoon duo of Ren and Stimpy! The boys over at Toy Headquarters have also snatched up the rights to produce Wayne's World on the GameBoy, Nintendo and Super NES formats...In other news from T*HQ (I know, two stories from these guys in a year is news), the new big boys of licensing are making moves to enter the Sega scene. While they officially have yet to receive their development agreement, Sega is letting them begin development on titles just like those previously mentioned for their Genesis platform...

...In new game news, the Quartermann has finally dug up the first solid info on the super sequel we've been waiting a year to see! Sonic 2 hits the Genesis with a whole new adventure, time-traveling action, and a special friend who helps out when the going gets tough! Check out EGM's special CES wrap-up for the first pictures of this dynamite new title...Look for the original Terminator to appear to appear on the Super NES soon! No, not courtesy of Acclaim (who'll deliver Terminator 2) or Virgin (who'll give us the Sega and Sega CD-ROM translations). This time, we get to see Arnie hit the 16-Bit scene from the folks at Software Toolworks! Yippieee!...Also look for Software Toolworks to bag Mel with a high action version of the Road Warrior...

...The Quartermann traveled around the world for this one! Street Fighter 3 is out and on the street. If you're looking to give the new machine a go-around, however, you'll have to make your way to France where our Champion Edition has been christened part Three...Look for Sega's Streets of Rage 2 to mock the most famous of all beat-em-up games when it's released later in the year...In closing, look for a new video game mag to hit the scene with inside info you won't find anywhere else! Although the Quarter-dude has seen only a preliminary copy, he's sure you'll find Electronic Games an exciting new vision...In closing, look for the Q-Mann's exclusive report from the Summer CES and no Dave, I didn't forget, the Q-Mann is perfectly aware that Frogger came from Konami...

SEGA CD-ROM TO SELL FOR \$299, THREE CDs INCLUDED WITH SYSTEM...

Last issue EGM broke the news on Sega's top secret marketing plan for their CD-ROM add-on peripheral. As our World Net™ sources indicated, the new Sega CD (name change from Mega CD) will retail for \$299 and come packaged with 3 CD's and an 8 Meg RAM cartridge.

In an official press release, Sega announced their marketing plan for their new Sega CD peripheral.

\$299 Retail Price

As expected, Sega could not bring out their CD-ROM drive for the same price (\$370) as they did in Japan last December. The first indication of the system's 'true price' was the recent lowering of the Japanese Mega CD to \$250. Also, with Nintendo announcing a \$200 price point for their future CD-ROM system, Sega had to come in with a reasonable price that compared favorably with Nintendo's. While not matching the \$200 price, they have been able to create an equivalent 'value' by including several additional items with the peripheral.

Virgins version allows for dual-screen play only. See special 22 page CD-ROM supplement for actual Sega CD screen shots.

Packaged with the Sega CD will be the game Sherlock Holmes Consulting Detective.

The Sega CD (name change) will sell for \$299 and come with 3 pack-in discs!

Pack-In Games

Included with the Sega CD peripheral will be 3 CDs and an 8 Meg RAM cartridge.

The main pack-in disc will not be the long awaited Sonic sequel on CD. Instead it will be Sherlock Holmes: Consulting Detective. The Sega CD version is expected to be the same game as ICOM's version for the TurboGrafx CD. However, since the Sega CD player can do more than the Turbo unit, the quality of the moving video (more frames per second) is expected to be better as well as the voices should have better synchronization with the action. Whether this CD will have a high enough impact on the players to get them to go out and buy the system has yet to be seen.

Also included with the peripheral will be a CD in Sega's new category called Collector's Editions. This CD will contain five of Sega's older 'top-selling' cartridges. The specific game titles to be on this CD were not available at press time.

The third CD will be a CD+G (graphics) video disc sampler.

Available Second Half '92

What wasn't announced was when the system would be available. The release date has been moved back several times from Spring, to Summer, to September, to Fall, and now to a less specific Second Half of '92. Since the hardware is, for the most part, finished, one would expect the delay to be in the completion of the software.

New Games...

Sega is still quiet about the new games for their Sega CD. Virgin has announced though, that they will have, as early as the end of the year, a CD version of their hot Genesis Terminator cart and also a CD version of Out of This World.

For the very latest information and pictures on everything that was on display at the Summer Consumer Electronics Show, don't forget to check out the exclusive 32 page bonus CES preview magazine packaged with this issue. As expected, EGM is still the only mag with full coverage in July!!

Virgin's hot Genesis title - Terminator, will be one of the first third party Sega CD games.

**WE HAVE
ONE THING
TO SAY
ABOUT
CONTRA[®] III
FOR THE
SUPER NES.[™]**

The background is a vibrant, swirling red and orange flame-like pattern. Scattered across this background are several tilted comic book panels. The largest panel at the top shows a blue, scaly monster with a long, glowing orange mouth breathing fire at a brick building. Other panels show various scenes: a city street at night with a yellow vehicle, a monster's face, a monster's hand, and a monster's head. The word "BOOM." is centered in a large, white, bold font with a black outline, set against a dark, irregular shape.

BOOM.

In case you haven't heard, legendary Contra commandos have raided the 16-bit scene and blasted it to ballistic dimensions. **CONTRA III - THE ALIEN WARS™** is primed and designed to blow your mind. It will do things with your Super NES™ you never thought possible, and leave you quaking in your combat boots.

Mode 7 technology brings new meaning to military intelligence, engulfing you in a 3-D sensation and surrounding you with an alien-ridden apocalypse. Hyper-speed graphics run smooth with no breakups through vivid and volatile city streets, highways, skyways, factories and desert badlands to the guts of the archenemy alien, notorious Red Falcon. Scale walls and grip girders and ropes to maneuver your way past an army of gigantic beasts bursting out of your screen. Blast your way through side and top-view missions with advanced, double-fisted weapons. The explosions are the next best thing to being there, without the smell of smoldering alien.

This is the big one.
The mission your
Super NES was
built for.

An added feature is the space combat scenes where you can take over orbiting space stations.

"Throw Some Wild Curves!"

Whoa! What happened to that pitch? Only with **GAMEHANDLER**, you can really throw some wild curve balls in the original Baseball from Nintendo. Simply hold your **GAMEHANDLER** controller upside-down as you push the button to release the pitch. Now quickly pull up and move your hand slowly left and slowly right back and forth to control the pitch—even out towards first base and back. You can even get strikes behind the batter! You can hit the pitches.

NO CODES

NO PROGRAMMING

And I'm cute too!

Here's a neat trick for **Tiny Toons** that can be done only with **GAMEHANDLER**. You can make Buster or any of the other characters go super-speed to complete any level. This one's real easy. When you make Buster run to the left, just keep tilting your **GAMEHANDLER** controller to the left real far. Buster will go into a cute pose facing left still, but now he'll be moving to the right at breakneck speed.

STREET FIGHTER 2: CHAMPION EDITION

For the past couple of months, our faithful readers have been sending in the methods to perform the new boss attacks, so we decided it was time to set the record straight! The code is as follows: L-left, R-right,

U-up, D-down, C-charge for two seconds, DL-down left corner, etc.

Balrog, the American boxer, has three power moves, plus a headbutt. The moves are a charging uppercut, a charging hook punch and his awesome turn-around punch. Vega sports a backflip, wall climb slash, wall climb back drop, rolling triple attack and his normal back drop. Sagat wields the Tiger Uppercut, a low tiger ball, a high tiger ball and a throw. M.Bison has his flaming torpedo, head stomp and a flip kick. Watch out for this fearsome foursome in Street Fighter 2!

Somewhere in the deepest reaches of the Gamma Mu Eta system lies a planet no one knows to be live or dead. The surface appears to be moving, but not like oceans, according to displacement readings and photos from a probe nearby. What mystery is held by this big green glob in the middle of space?

This question and others have been left in the somewhat capable hands of space jockeys Todd and Rooney. The administration supplies them with everything they need to plot and document Slime Planet. NEXT WAVE

NEW SOFT NEWS

With CES just days away, the software companies are now starting to talk about their Fall and Winter lineup. The biggest news comes from Tecmo. While it is common knowledge that they are doing NBA Basketball for the NES and Super NBA Basketball for the Super NES, what is revolutionary is what they are doing in the games. The basketball season consists of some 1,186 games. That would be a lot for a player to sit down and play. In their carts you can do that, or you can program in any win/loss record for the teams! Pick up the sports pages half way through the season, program in the current real win/loss stats, and finish the season! Or, put in stats that equal a playoff situation, and then start playing the playoffs. Why others like E.A. haven't thought of doing this is a mystery, but, one thing's for sure, NBA Basketball is going to be one hot cart.

In other news, American Technos is doing Street Challenge for the NES; Capcom is going back to Disney for 2 new S-NES games - Land of Mystery starring Mickey Mouse, and Goof Troop. They also got the Star Wars and Empire Strikes Back titles for the Game Boy. EA is updating their Genesis hockey game to now include the actual NHL players. Parker Brothers is taking their popular Monopoly and Clue to the Genesis. Talto is working on a game called Panic Restaurant for the NES and one called Knight Quest for the GB. Virgin is porting over McKids to the GB, it will be called Two Cool Kids; they also are working on a Genesis hockey game to be endorsed by Gordie Howe. For the latest on the games of CES don't miss out special 32 page mag pack- aged along with this issue of EGM!

So action-packed, you'll go rocketing, blasting, and splashing your way through 8 stages in Thunder Spirits™, the Super NES™ Action/Arcade classic. AN ONGOING SAGA OF JUSTICE...

One of the greatest American heroes of all time would have to be Batman, the Caped Crusader. His legacy has entertained several generations of men and women ever since his dramatic appearance on the comic book scene in Detective Comics #27 back in 1939! Ever since then, he has appeared in numerous comic books of his own, plus several guest appearances in others. Batman has also shown up in a few black and white picture shows and finally, he starred in his

own television series in 1966. Recently, nearly everyone in America was treated to the masterful movie Batman, starring Michael Keaton, Kim Basinger and Jack Nicholson. This summer, the sequel, Batman Returns, is going to hit the silver screen full force, backed by secretive plots and mystery guest appearances. This could be the movie of 1992!

AN ONGOING SAGA OF VIDEO GAMES...

Another not so well-known playground for Batman fans has been the ever-growing video game scene. The first Batman video game appeared on the Nintendo Entertainment System, created by Sunsoft in 1990. It featured five levels of play utilizing many of the familiar settings of the blockbuster movie. Places like the Axis Chemical Plant, the streets of Gotham City and the Gotham Cathedral were all portrayed throughout the video game. Sunsoft also went so far as to create a 16-Bit Genesis version and a Game Boy title of the same name with different game play.

In the following year, Sunsoft quickly made and carried out plans for a sequel to each of these formats based on Batman: The Return of the Joker. The NES and

BATMAN...

When Bruce Wayne was but a young lad, he was granted the horrible privilege of watching his parents being murdered before his very eyes. Since that moment, he ceased to be Bruce Wayne, but instead became his alter ego: Batman, the Dark Knight! In his quest to protect Gotham City, Batman met and fell deeply in love with the photo journalist Viki Vale. The Joker is an evil man disfigured physically and mentally by a chemical accident. He is the man who murdered Batman's parents, and now he is the one who has kidnapped Viki Vale. Only Batman can rescue her!

GameBoy versions have already been released, while the Genesis version is almost ready for production. These games chronicle the Joker's return to a life of crime after miraculously surviving the fall from Gotham's Cathedral. Each of these titles feature enhanced graphics over their predecessors, and even better game play.

With the rise of the movie this summer, Konami has jumped at the chance to create Batman Returns for all three Nintendo formats: the NES, the Super NES and GameBoy. Each game will feature key points and scenes taken directly from the sure-fire hit movie. Of course, Sega couldn't be left out of the spotlight, so expect to see the Genesis and Game Gear versions of Batman Returns to appear soon. Sega will be programming its versions itself.

The latest version of Batman Returns is, amazingly enough, on the Atari Lynx! This 2-Meg wonder sports vivid color and tons of action.

The 16-Bit Sega machine shows off its stuff at the finish line!

Take to the waters with earnest, but watch your stamina!

Barcelona '92

READY, SET, GO!!

Barcelona '92 for Game Gear is on the scene, and its only competition is its 16-Bit cousin on the Genesis!

You will compete in seven Olympic events: hammer throw, 100 meter hurdles, archery, diving, swimming, 100 meter dash and pole vaulting.

These games will test your skill and stamina, since you need to hit buttons 1 and 2 intermittently to gain speed. The most difficult event is diving! You can accomplish so many awesome aerial maneuvers that the timing becomes split second. Looking beyond the incredible graphics and animation, you may realize that this version is 100% portable! The control is precise and well-deserving of a closer look in the future for all Game Gear owners. Practice before you attempt the mini or full Olympics modes. Sometimes, the practice mode will show you how to perform even the most difficult moves! This comes in handy for the diving ses-

sion and the pole vault events.

After all of that, you can even choose between eight different languages for the text as well!

Test your rapid fire fingers in the 100 meter dash!

The tougher the dive you attempt, the better your score.

THE UNIVERSE IS CALLING

The Illis solar system has been attacked by a mysterious enemy force. After many long months of constant battle the solar system's small but tough forces are almost completely gone. Only one spaceship remains, Axelay. You must successfully pilot the Axelay, destroy the enemy forces from the source and regain freedom for the Illis solar system and the entire galaxy. The Axelay spaceship is one of the fastest and most maneuverable ships in the galaxy and it is also equipped with eight special weapons in addition to the main cannons.

NOT YOUR TYPICAL BALL GAME

Here is a game unlike any you have ever seen coming to the Super NES! Based on an arcade game called Cameltry, On The Ball is a game of skill in which you must rotate the whole screen in order to roll the ball to reach the goal at the end of the maze. A timer will clock you as you progress, and when it reaches "0," the game ends. If you finish the round with time left over, the remaining time will be added to the next round. Huge amounts of

obstacles will get in the way of you reaching the goal. Some items include bricks, timers,

IN THE BALL

force fields, rocks, point blocks, jagged edges and more. There are ways to make the ball jump and increase in speed. The four modes that will challenge your abilities are Training, Beginner, Expert and Special. At the end of each mode, there will be a final round which will test your strategy skills to make it in the given time. If you finish a level with under 10 seconds to spare, you will go in a lucky chance slot machine round in which you can gain extra time for your next round. Once the game ends, you can try to match numbers for more level time. With this combination of skill and puzzle action, you had better be on the ball!

Hit the blocks that give you added seconds, so you can finish the level on time.

The force fields will make you hit the timers that take seconds away.

This is it! You made it to the goal with time to spare! Now, it is on to the next level!

STINGING WEAPONS!

At the beginning of the game, you have a choice of where to go, either the front door, or the back door. It will determine where you have to return.

STINGING WEAPONS!

If you find the flashing wasp and shoot it, you can get many power-ups for your shot or stinger!

There are particular areas that you can search that contain power-ups and other useful items. However, not all of them will contain things that you need.

OH HONEY!

In order to please your queen, you must secure all of the honey that the nest can sustain until the next time you need to go out for more. To get honey, you need to fly into the flowers and collect pollen. After every three flowers you visit, you must return to your home base.

PUT A LITTLE STING IN YOUR SHOTS!

Camérica has just come up with a fantastic new idea, and that is to have you take on the roll of a worker bee for your community hive and protect it from intruding insects and other *buggers*!

Bee 52 is set up in a shooter fashion. You are able to move either direction across the gardens, swamps, lakes, or whatever else you may discover while trying to find pollen and make honey.

By spitting out a substance, you can attack creatures, or you can fly over them and suddenly come down with a powerful sting attack!

You can also collect power-ups that provide you a three way shot, super rapid fire, bombs (yes, that's right), or a little bee-buddy that helps you out! Now, buzz off and go get that honey!

Get the eggs! You must find the giant eggs that can feed a family for a year. Hurry they're hungry!

This is the island on which you must search for the giant eggs. Your path is marked in red dots.

A LONG WAY TO GO FOR DINNER!

If you are like me and think the tasmanian devil totally rules as a cartoon character, then you too will go crazy over him as a video game. The graphics are incredible! It looks just like the cartoon (except you are controlling the action). The tasmanian devil's patented spin run movement is here, as well as his ferocious appetite. (He will eat just about anything!) Most of the game involves your search for giant eggs from birds that lived long ago (you can feed a family for a year on just one). To do this, you must go all over the island, where you will see a desert with fountains shooting up from the ground that you can ride. Also, you'll see (and become part of, if you're not careful) a factory that makes tanks. Pass through coal mine shafts on a rail car that goes up and down to avoid obstacles. There is a cold area with penguins and frozen water to discover. Then, there is the jungle with man (or devil) eating plants to survive. Go get those eggs for your family!

TAZ MANIA

Your tasmanian devil will eat anything it comes into contact with, and some will give you extra life.

Look out for the rock monsters! They are all over in the early part of the island (quicksand too)!

Jump up...there?! Some ledges are too high for you. You must use boxes (and such) to reach.

Travel the old coal mine shaft in your coal car. Prepare for an up and down adventure in the dark!

BRRR it's cold! On the wintry side of the island, the ground is slick. Don't slide and fall a lot!

What now?! You can see the creator's sense of humor did not go to waste. It's truly entertaining.

KING SALMON

Hook, Line and Sinkers!

Forget about all that tackle. Forget about lugging a boat all over kingdom come. Forget about fishing licenses, worms, hooks and wasted time looking for that special "spot" on the lake. Forget all of that because King Salmon by Sage's Creation is here for the Genesis!

While King Salmon does not actually take the place of real fishing, it offers some very challenging game play and requires a lot of technique.

You can change lures and depth while trolling, depending on your location. After completing one round of the tournament, you get to go to another more challenging round.

Of course, the real excitement is in landing the fish. This requires both skill and patience (lots of patience!).

Cast out your line, get hooked and don't let this **big** one by Sage's Creation get away!

*Congratulations, you caught one!
Now, you can go to the next area.*

Your own private guide tells you where the fish are biting!

Make any changes in depth and tackle in the options menu.

While trolling, tow your lure behind the boat while you look for the elusive salmon.

Watch for other boats! If you collide too many times, you will be disqualified!

When a fish hits the line, a window in the lower left corner is displayed to show the ensuing battle.

Many things can (and will) go wrong when you are trying to land a fish. Be prepared for anything!

Fish depth and amount of line that you have out are shown. You can even see the fish underwater!

To land a fish you must learn to "pump." Pumping is a technique where the rod is pulled back in order to exhaust the fish.

THE TERMINATOR

Terminate, or be terminated....

YOU WILL LOSE!

The year is 2029 and after the nuclear holocaust the land has become dominated by cybernetic robots trying to rid the Earth of all human life forms. Kyle Reese is a modern day time traveler who goes back in time to L.A.. You must play the role of Kyle Reese and protect Sarah Conner from the Terminator (a cybernetic assassin sent back in time to kill Sarah Conner) because she holds the secret to the survival of the entire human race of the future. Only by saving her can the

course of time be changed to ensure a peaceful future for generations to come. In addition to saving Sarah Conner, you must infiltrate the Cyberdyne Corporation's tight security and destroy it along with the cybernetics that created the Terminator of the future. The final catch is that you must also destroy the Terminator itself, who is stronger, faster, and more intelligent than you. To do this, you must find this weakness and use it against him. The fate of the human race and the world is in your hands. Can you terminate the Terminator?

When you start the game, and at the beginning of each level, you will receive a detailed briefing in which you will be given your mission objective. In level one, you must successfully make your way through Cyberdyne's heavily guarded security systems. Above ground, be very careful to avoid the bombs being dropped.

In level two, you will find yourself inside Cyberdyne's facility. Kyle Reese's only weapon is his trusty hand grenade. You must use it to destroy all the enemies that get in your way. Be sure to keep a close eye on your power meter because if you don't, you'll find yourself starting all over again.

CENTIPEDE

Oh no! There are too many to handle! Kill the centipede segments as they fall.

IN THE GARDEN WITH THE BUGS!

If you did not get enough of Centipede the first time around, or you just hate bugs, then Accolade has got you covered. The remake of Centipede for the GameBoy is true to the original arcade classic. Basically, you shoot the centipedes coming down the screen and turn them into mushrooms.

You must avoid other little pests as well, such as the spider that will

Kill the spider as quickly as you can. It is truly a pain. It hovers and dives at you, so be aware.

Sitting ducks! Actually, they are sitting bugs. Centipedes are easy to kill in a straight line.

Get a plan here dude! The best way to get the centipede is to make one path for him to travel.

That darn flea is back! It leaves behind mushrooms as it falls to the bottom.

Get the scorpion as it crosses the screen. This creature leaves poisonous mushrooms behind it!

jump up and down and dive at you. It will just make your day in the garden a challenge. You will also meet the flea that comes diving straight down the screen at you leaving a trail of mushrooms behind it (go ahead and blast that annoyance!). There is also a scorpion running around loose that touches mushrooms and makes them poisonous. Thus, when the centipedes touch them, they fall straight down at you!

The truly great part of this awesome remake is the different option games from which you can choose.

Check out the various options! It is Centipede like never before with many different styles of play.

You can play in one or two player modes. Also, if you have a second system, you can even play as a team. Check out what is happening the garden and see why Centipede is still one of the greats.

WELCOME TO THE EVIL GATE!

In this round, you must crack one of the eggs open. Be sure to crack the third egg from the top to get a 1-up. Try to crack two eggs at once by using the Stone Wheel!

LEVEL SEVEN

1. Watch for the rolling stones that come down the slope. Use the Wheel to crush them.
2. Cave nerds will jump off of this cliff, so be careful.
3. Don't let this cave nerd get the drop on you.
4. If you have no weapons when you get to the Boss, jump and grab the Bone in the air.

BOSS SEVEN

This Pterodon is a bit stronger than the last. Use the Stone Wheel or the Boomerang for best results. It will attack you with two low passes and two overhead passes. Attack it aggressively from either side.

LEVEL SEVEN

LEVEL EIGHT

BOSS EIGHT

Boss Eight is a big and nasty Tyrannosaurus that really means business. Use the Stone Wheel to cause the most damage to the Boss. It will spit rocks and cavemen at you, so be on your guard when it opens its mouth. It will strike at you on the ground; use your club to get in a few good hits.

BONUS FOUR

LEVEL NINE

LEVEL NINE

1. Go as far to the left as possible and crack the red egg here to get to Bonus Five. There are three 1-ups and a valuable key in this bonus area.
2. The baby Tyrannosaurs can be jumped over or killed with a few hits.
3. Watch for flames that shoot out of the lava in this level.
4. Don't bother getting the first fire icon, jump over and go to the other side.
5. Don't crack open these eggs, baby Pterodactyls will come out and try to harm you.

BOSS NINE

Boss Nine is a spiked dino with an attitude. It will jump around while curling up into a ball. The only time that you can hurt it is when it uncurls to look at you. Use Stone Wheels or Boomerangs. Don't stand in the center of the screen. He will try to crush you with fast dives.

BONUS FIVE

OH BOY! ANOTHER EVIL GATE TO OPEN!

In this special room you have to fight 4 baby man-eating plants. Just kill them off and rescue a Cavebabe. She'll give you a kiss and refill your energy for you.

LEVEL EIGHT

1. This level is filled with large moving rocks. Don't fall into the bottomless pit.
2. You can break these large boulders with a few hits.
3. Stand on the edge and kill the baby dinos before cracking the red egg to get to Bonus Four.
4. You can fill up on meat here and replenish you life.
5. If you've already finished this level, get the 1-up and press pause. Now, hit select to get out. Repeat to max out your lives!

LEVEL TEN

BOSS TEN

You will be attacked by a dinosaur skeleton. All you have to do is hit it in the head with your weapon. It will break into many pieces and fall towards the ground. Crouch in the lower left hand corner for safety. After you cause significant damage to the Boss, its head will detach and strike at you. Just jump over and hit it from below when it returns to the body.

BONUS THREE

LEVEL ELEVEN-ONE

BOSS TEN

This big Tyrannosaurus is about the same as the previous bosses, but a lot stronger. The best weapon to use is the Stone Wheel because of its strength.

LEVEL TEN

1. Take out the baby Tyrannosaurus and you'll get a big steak.
2. Crack the egg when you are at the far left and the friendly Pterodactyl will bring you to Bonus Six!
3. Watch out for the caveman that is trying to drop the boulder on you.
4. You can jump across by using the Pterodactyls, or the small ledges at the bottom.
5. Use the rock to help boost you up to the meat.
6. Kill the Tyranno for more meat.

POWER-UP AND RESCUE A BABE!

In this special room, you have to fight a baby Tyrannosaurus. You will rescue a cavebabe, who will give you a big kiss and refill your energy.

LEVEL ELEVEN-ONE

1. Collect full power-ups!
2. Kill the baby dino for a meat.
3. Watch out for boulders dropped by the Pterodactyls as you jump over the ledges.
4. Run to avoid the giant boulder.
5. Jump on top of the Pterodactyls to make it over the lava.

COLLECT 4 EXTRA LIVES TO SURVIVE!

You must collect all of the meat that falls from the sky. A 1-up will appear; let it drop to the ground and four more will appear. Grab them as fast as you can.

LEVEL ELEVEN-TWO

1. Watch out for the cave dude in the primitive go-cart!
2. Use the Wheel in these areas. It will climb over the walls and kill the cavemen before you even get to them.
3. Cavemen will drop from the ceiling, trying to gang up on you.
4. Watch out for the spikes; they are extremely deadly.
5. A large boulder will fall from the ceiling. Keep running to avoid it and you will come face to face with the last Boss!

LEVEL ELEVEN-TWO

THE LAST BOSS!

This little devil is the cause of all our problems. 1. It doesn't have the guts to fight you, at first. It will send a multitude of giant man eating plants your way.

2. Use the Stone Wheel and hit it from below.

3. It will duplicate itself and change its clone into a evil version of Mac. A few Stone Wheels and a couple hits with the club should do the work.

4. Don't be fooled, this isn't the end of the battle.

5. The devil will come back in a new blue body, with meaner and faster attacks than before. Keep throwing Wheels towards it and into the air.

6. One of its new attacks is the fire rings.

7. It will also try to spit fire at you. Be sure to jump when the flames hit the ground.

8. The final blow will knock it out of the sky!

Meet The Faces Behind Most Medical Advances.

There are a lot of doctors and researchers out there who deserve credit for society's medical achievements. But the fact is, they'll have to share the credit. Because before any medical project can break new ground, it has to get off the ground. And that takes money. We urge you to contribute to the hospital of your choice. Your help could mean a solution to many of today's most pressing medical concerns. The first of which is, quite frankly, funding.

Give To Your
Local Hospital.
Give To Life.
